

Get your site up to speed with SilkRoad Eprise Site Review

SILKROAD EPRISE SITE REVIEW

Website objectives shift over time, as do the product capabilities of Eprise. As SilkRoad continues to innovate by optimizing Eprise and adding new features, significant value can be derived by reviewing these features in the context of your current objectives. SilkRoad Services has product experts who provide a specific set of recommendations that will maximize your investment.

Developed from SilkRoad's outstanding implementation record with organizations such as yours, Site Review is a process delivered by our product experts that provides value through their extensive product and implementation experience. The scope of the SilkRoad Eprise Site Review is to provide a document with specific steps and recommendations based on an on-site review. SilkRoad emphasizes knowledge transfer, and all Site Reviews are conducted with your team such that a deep understanding of the recommendations can be developed.

The following are great times to consider a site review:

- ✔ Your website objectives or traffic volumes have changed over time and the implementation is no longer meeting all of your new performance or feature requirements
- ✔ New development initiatives are being planned that you wish to leverage best practices to maximize the project's success
- ✔ It has been one year or longer since your latest site review or initial launch
- ✔ You are planning on upgrading versions and want to ensure you are maximizing all new features

Reviews can be tailored to focus on a specific objective or can be broader and treated as a routine check-up. The following are focal points of a typical Site Review.

- ✔ General recommendations based on current SilkRoad Eprise Best Practices
- ✔ Site Performance optimization
- ✔ Proper configuration settings
- ✔ Custom feature implementation recommendations
- ✔ Site expansion strategies
- ✔ Better leveraging features of current product releases
- ✔ Knowledge transfer to your team

SilkRoad Eprise Site Review service is generally a five day project with approximately two days on-site and the remaining time for issue research and the development of the recommendations document. Your Site Review consultant will remain accessible to you for a period of time after document delivery for follow-up questions or clarifications. If you'd like to inquire about a site review for your organization, please contact info@silkroadtech.com.
